Write a word problem for $52 \div 5$.

I have 52 dogs. 5 dogs fit in a room. How many rooms do I have?

Solve your problem. As you solve the problem explain your reasoning and show your work. Be sure to tell what you will do with the remainder if there is one.

What you do is you have to make another group. I divided $50 \div 5 = 10$ then a / more because of the leftover.

$52 \div 5 = 11$

What is the answer to your problem? 11 rooms.
Write a word problem for $52 \div 5$.

There are 52 apples in an orchard. The farmer wanted to fit in a basket. How many apples fit in each basket.

Solve your problem. As you solve the problem explain your reasoning and show your work. Be sure to tell what you will do with the remainder if there is one.

\[
\begin{align*}
50 & \quad (10 \times 5) + 2 = 52 \\
\text{(Process)}
\end{align*}
\]

I did this because 5 does not go into 50, so I used multiplying and addition. (10x5)+2 = 52

What is the answer to your problem?
Sample C

It's Your Story

Write a word problem for \( 52 \div 5 \):

I had 52 cookies I divided it in to 5 friends and when I started to divide them I started to give each friend 5 until I got to 52 and I got my answer but first I had to make sure that each 5 friends got the same amount and so when I divided 52 \( \div 5 \) and my answer was 10.

Solve your problem. As you solve the problem explain your reasoning and show your work. Be sure to tell what you will do with the remainder if there is one.

\[
\begin{array}{cccccc}
\text{😊} & \text{😊} & \text{😊} & \text{😊} & \text{😊} & \text{😊} \\
\text{ раствор } & \text{ раствор } & \text{ раствор } & \text{ раствор } & \text{ раствор } & 2
\end{array}
\]

\[52 \div 5 = 10\]

And for the 2 left I am going to give them to cherity.

What is the answer to your problem? 10 r 2
It’s Your Story

Write a word problem for $52 \div 5$.

There are fifty two boxes. All of the boxes have 5 toys in them. How many groups of boxes are there.

Solve your problem. As you solve the problem explain your reasoning and show your work. Be sure to tell what you will do with the remainder if there is one.

The remainder is two toys give to homples

What is the answer to your problem? 10 groups boxes
It's Your Story

Write a word problem for $52 \div 5$.

Barak Obama has 52 cars. Then Barak Obama gave 5 of his cars to Gabriel. How many cars does Barak Obama have left?

Solve your problem. As you solve the problem explain your reasoning and show your work. Be sure to tell what you will do with the remainder if there is one.

\[
\begin{array}{c}
22 \\
30 \\
\hline
52 \\
\end{array}
\]

What is the answer to your problem? 22 cars
It's Your Story

Write a word problem for $52 \div 5$.

Kathryn had 52 pieces of candy. Alex had 5 pieces of candy. They both counted the candy together and the split it back to the same amount they had. So how much candy did they have all together?

Solve your problem. As you solve the problem explain your reasoning and show your work. Be sure to tell what you will do with the remainder if there is one.

```
515.2
-255
---
207
-25
---
10 R2
```

Kathryn - 52 pieces of candy
Alex - 5 pieces of candy

I will put the remainder after the number like 85 R3 (example)

What is the answer to your problem? 10 R2 all together
