### Standards for Mathematical Practice

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. **Model with mathematics.**
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning

**Conceptual Category:**
Functions

**Domain:**
Linear, Quadratic, & Exponential Models

**Cluster:**
Interpret expressions for functions in terms of the situation they model

**Standard:**
5. Interpret the parameters in a linear or exponential function in terms of a context.
