Maria needs your help to measure the length of her crayon. How long is Maria’s crayon?

Answer **about four inches**

Tell how you solved this problem using pictures, numbers or words.

because it can’t be five inches so it can’t be about four so it’s not five

so it’s not five but it’s not four

So it’s probably about four.
Solve the problem below. Show your work in the box.

Maria needs your help to measure the length of her crayon. How long is Maria’s crayon?

Answer \( \frac{3}{2} \) inches

Tell how you solved this problem using pictures, numbers or words.

You had to start where the crayon was and end where the end of the crayon.
Solve the problem below. Show your work in the box.

Maria needs your help to measure the length of her crayon. How long is Maria’s crayon?

Answer: 3 and a half inches

Tell how you solved this problem using pictures, numbers or words.

I know it is 3 and a half inches because if you put the crayon down to wear it starts and there you have your answer.
