

2006 Participants vs. Non-Participants: Satisfactory Performance* Fall Term Only

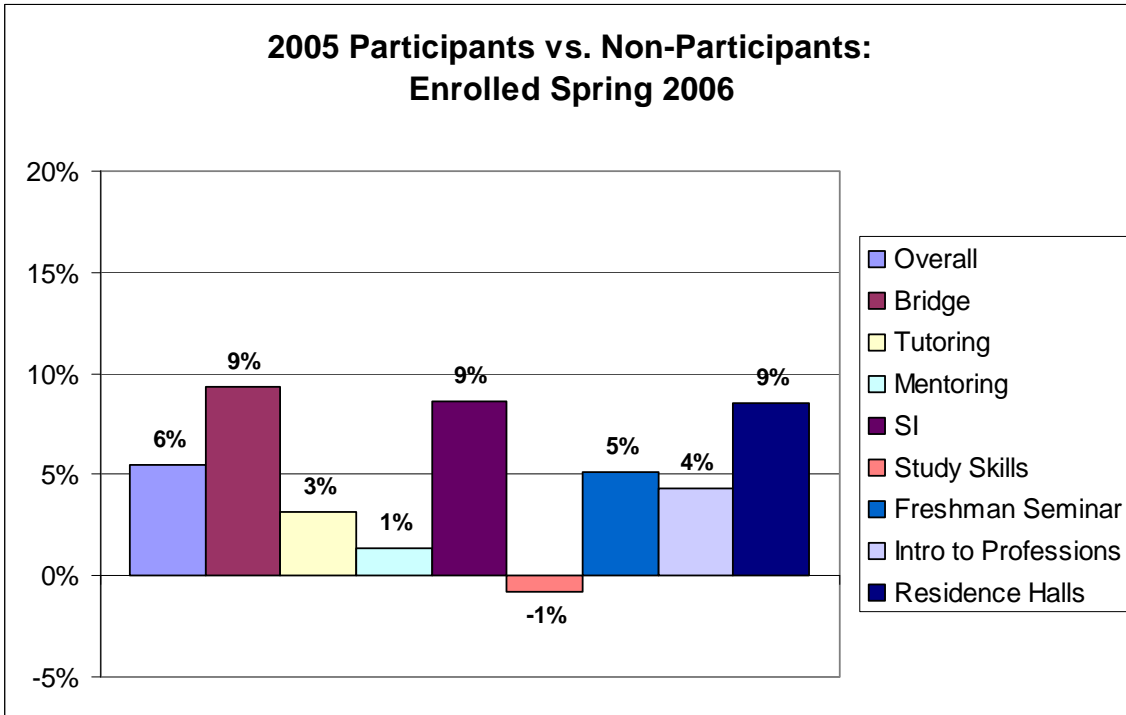

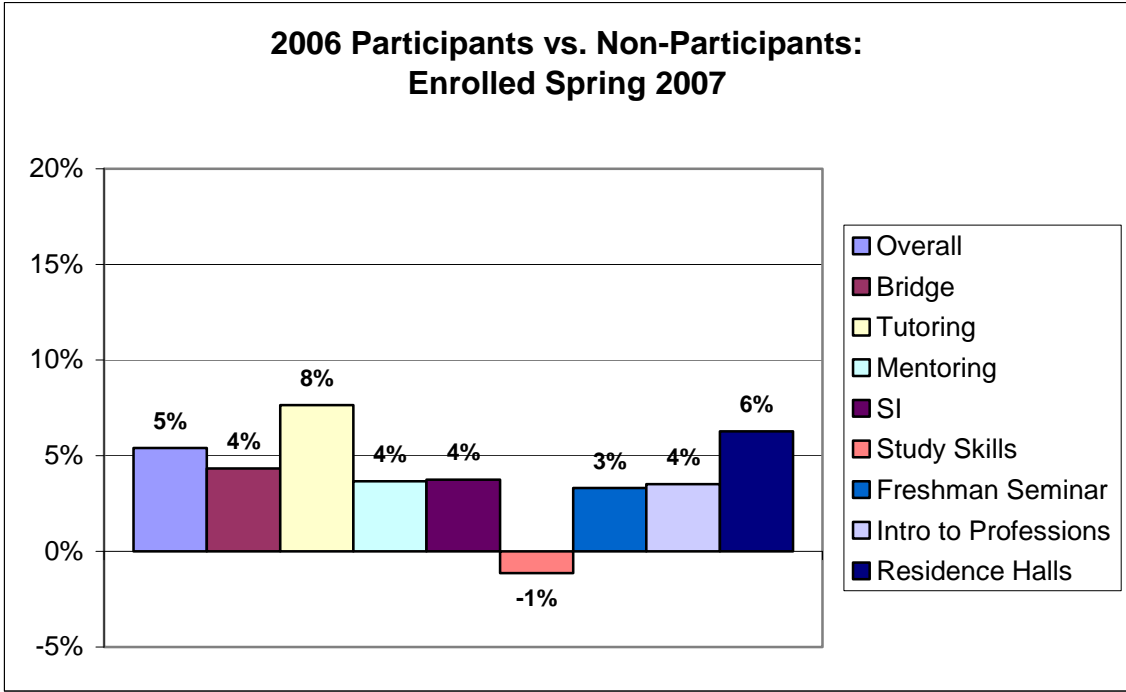

* Fall Semester Results

2005 Participants vs. Non-Participants: Satisfactory Performance* Fall Term Only

* Fall Semester Results

These charts illustrate the rate differential between those who did and those who did not participate in the various A2S intervention. For example, the satisfactory performance rate of those who participated in Supplemental Instruction was 16% greater than the rate for those who did not participate in SI in fall 2006. In 2005 it was 17% greater.

These charts illustrate the rate differential between those who did and those who did not participate in the various A2S intervention. For example, the retention rate of those who participated in Supplemental Instruction was 4% greater than the rate for those who did not participate in SI in fall 2006. In 2005 it was 9% greater.

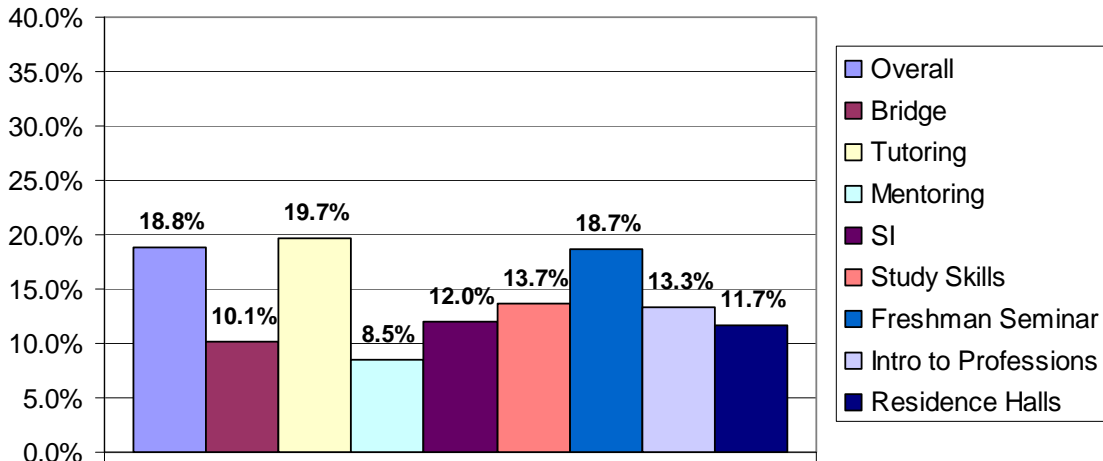

The following charts illustrate the overall gap found in satisfactory performance and retention between targeted and non-targeted populations.

On the next page, in the chart labeled 2006, the first bar is the gap found for the overall cohort.

The satisfactory completion rate for targeted populations was 59.9%. The sat completion rate for non-targeted populations was 78.7%. The difference, or gap, was 18.8%.

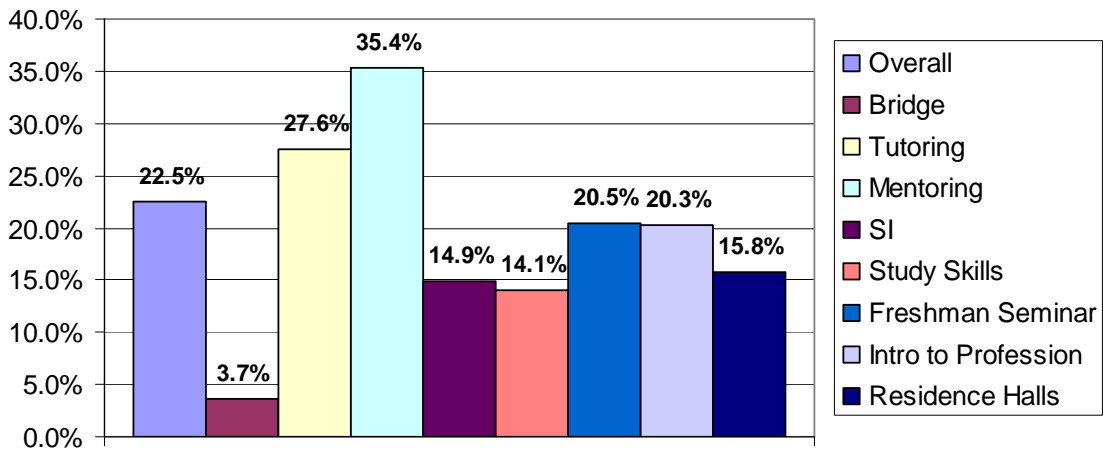

The remaining bars show the gaps between targeted and non-targeted for those who participated in each intervention. The closer that bar gets to 0, the more the gap has closed.
