2004 Graduating Senior Survey Student Comments College of Health Sciences

"Why" or "why not" responses to question "if you had to do it over again, would you choose to attend UWM?"

I have lived in Milwaukee my whole life and I think that would have rather gone somewhere farther from home.

Enjoyed my experience. Great professors! Great city!

Parking was such a huge hassle and expensive

It was a cost effective way to obtain a degree.

not best for my major plus they have screwed up financial aid numerous times, poor istructors.

I like the Campus layout and the location.

Overall I had great instructors, the campus is in a nice neighborhood, the tuition is not too high, and I was able to limit my expenses by commuting from my parents home instead of living on or near campus.

I feel the teachers are ver down to earth and realistic when they present lectures. The teachers here make things challenging without tricking you about what will be on exams.

The only reason i wouldnt is because I would have liked to get out of wisconsin and go someplace completely different that what i have grown up in.

Nothing at UWM stood out that would make me definitely come back, but I don't have any complaints about being a student here.

Because it is a local school that offered my degree

I enjoyed the program I was in and the professors were very knowledgable and personable.

There is not mcuh scholarship and financial aid for international student (undergrad) comparing to other colleges. Besides, the tuition is too expensive to students. I do not know where those money goes.

While at first UWM was not my first choice, it became my best choice after starting my freshman year.

Student Comments regarding question "do you feel a sense of commitment to and involvement with UWM?"

I think that because I commute everyday, I have been left out of the loop. I think that UWM has a lot to offer, but many students don't ever have the chance to get involved because they don't even know what activities are available.

UWM gave me so much in all areas of my life. I definitely feel a sense of commitment as they were committed to me. because I was involved in Athletics, I feel a sense of family here. I was also involved in a student group, NSSLHA, in which I developed

Since I was paying for my tuition, I felt a need to make the most of it and do the best I could with all of my classes.

not sure

I have been an Atheltic Training Student for the past four years, so I have devoted the last four years of my life to the school.

As an incoming freshman, I feel I was not told enough about extra-curriclulars or other events going on that I would have attended or joined had I known. I feel there is some sort of lack of communication at times.

I spent most of my time working in the training room on campus.

The Occupational Therapy department instructors take a personal interest in each of their students. They are very knowledgeable in their fields and provide well developed classes.

I had a good experience here.

I feel that I have participated in many activities through the university.

Overall I would say I had a positive experience here.

Kind of. I have a lot of friends here and we try to get involved as much as we can.

It has a well known Occupational Therapy program.

Did not really have the chance to be involved. I felt that there was minimal school spirit, and hard to be involved.

Easy access school

I felt that UWM had a great occupational therapy program that offered many great opportunities to students.

Because I will be graduating from UMW and obtained my full education through them, I do feel a sense of commitment to the university.

Enjoy the city

I like the city of Milwaukee and living close to home.

I am involved in many campus clubs.

The HCA professors were wonderful, I loved every minute of my HCA classes.

The college of health sciences black and gold committee. I am in ACHE and hope to be very active post graduation

The advising staff was great.

The professors are personable and great to work with.

This is a great school.

cuz it's close to home

cuz I live off campus, and just come to go to class and that's it

I love to go to school everyday!

It was a part of my life for past 3yrs. I will miss our school so much.

I liked most of my instructors and met a lot of awesome people.

Cost, quality of the program for my major

I commuted to school and am also a nontraditional student. Most of my classmates were under 21 years of age so I didn't really feel like we had much in common as I am 10 years older.

Small classes, lots of attention

I was more involved with the program and profession, than the school

I thought that my program (CLS) was really good and I feel well prepared for my certification test.

I never really had much time to do extra activities.

The Kinesiology program was everything I expected it to be and more. I got a lot from my classes and feel I will be successful in my future career because of my education from UWM

The school doesn't really do much as far as going out of their way to get students involved in different activities, especially sporting events. There is so much student and alumni involvement at other schools and it's just a shame that there isn't that

Excellent school, but might want to go to a larger school

I don't feel a commitment to UWM as much as I do to my major

I was a transfer from Marquette for my second degree. The tuition is very reasonable but all these financial aid forms, etc. were confusing.

I did not attend classes on campus.

A lot of the classes seemed redundant and/or a waste of time. However, the classes the did seem applicable were very well done and worth the time/money

Teachers seemed as though they were very interested in our success and education. I never felt as if a teacher was just

Because of the staff, classes and programs offered

Yes, I've been there for three years full time. They helped me achieve my goals.

Depends on cost and accreditation status

Not really. There was a lack of school spirit
