2005 Graduating Senior Survey Student Comments School of Architecture and Urban Planning

"Why" or "why not" responses to question "if you had to do it over again, would you choose to attend UWM?"

As I continued to study architecture I've realized that I want to go towards the Interior Design Field.

Because I like the campus, faculty, and the milwaukee neighborhood.

Because I think ultimately that I will end up doing something other than architecture

Because it is close to my family and was the most affordable option for attending an architecture school.

Because of location, reputation, and experienced gained as a student.

Good experience at the school of architecture

Good program close to home.

Has a great Architectural & Urban Planning program

Over all I had a good time

I had a great UWM Experience, and would not change it at all.

I like the school

I recieved a complete and integrated architectural education here.

I think UWM's School of Architecture should have more women and minority staff members.

I thought the school of architecture could be a little more involved with getting kids put into internships during there schooling.

I was not really satisfied with the quality of courses offered by SARUP. It seemed that there were not a lot of quality courses to choose from and those that were good were quickly picked up.

I would apply to a higher ranked school

I would have done my undergraduate somewhere else and then come back to do grad school at UWM.

I would have stayed in my home state because it was extremely hard convincing the state here that I was a resident.

I would probably go to a bigger city.

It offered what I needed

It was a good experience, good place to study architecture.

It's still one of the top universities for my program.

I feel that there is much more hands on teaching that should be done.

Mostly because it is the only school for Architecure in the state of Wisconsin

My program is excellent, however the rest of the school is just so so

The Architecture program was the program that I wanted to study and it was close to home and somewhat affordable.

The Architecture Program is very good. The rest of the school is ok.

The architecture program met all my expectations and was a very enriching experience.

The new experiences of new enviroments are always good for human being, specially in architecture

The level of design guidance and the quality of the teaching staff was definatly satisfactory.

UWM was a great experience in my life and I believe that SARUP made me a more disciplined designer.

Well, I would really like to see what another school could offer.

When I first came here, I didn't know the process that was necessary to become an architect. I have just

recently discovered that the actual route requires me to go to another school.

Yes because I enjoyed my education here, however I still don't feel that I am ready for my field.

because i went to school here for architecture and it is the only school in the state to provide those studies. i can only afford in-state tuition

location and experienced teaching staff.

the atmosphere was great and the people are always willing to help.
