Probably No	Because UWM was not my first selection of schools, but i am very grateful of the opportunities that i gained while attending this school.
Probably No	I would have stayed in school at the university where I first started my degree.
Probably No	Milwaukee's Architecture school is more focused on design/methodology than it is with construction. Construction/construction documentation is the #1 job duty undergraduates are assigned when in the workforce (my opinion) and it should be imperatively enforced.
Probably No	School of Architecture wasn't as organized as initially thought. Granted the main reason for attending UWM was location and cost, educationally I feel I may have had a better experience elsewhere.
