

2011 Graduating Senior Survey Student Comments
College of Health Sciences

If you had it to do all over again, would you choose UWM?	Why or why not?
Definitely	1) student ratio 2) Technologies 3) Campus
Definitely	Great experience at a Division 1 University.
Definitely	Great experience.
Definitely	great school
Definitely	Has a great culture focus and has my intended major
Definitely	I am very satisfied with the education I received at UWM.
Definitely	I enjoy the atmosphere and the relationships I have built along this journey.
Definitely	I enjoyed the atmosphere.
Definitely	I had a good experience and it was close to home
Definitely	I had a wonderful experience at UWM
Definitely	I liked being in the city.
Definitely	I love the school, the professors and the location!
Definitely	I really enjoy the big city and the knowledge of all of the professors I was able to learn from.
Definitely	I really enjoyed the atmosphere of the big city. I also learned a lot through the College of Health Sciences, under-graduate occupational therapy program.
Definitely	I received a better education and had better experiences at UWM than the college I started at.
Definitely	Only for Athletic Training or other health related field. We have an outstanding program and HS/HMS departments
Definitely	The MLS program is accredited and ranked as one of the best in the country.
Definitely	The MLS program was a well organized program with passionate teachers and program director. The UWM faculty really cares for the students and did their best even when we did not do ours in times of tough, tiring, and exhausted times.
Definitely	The only school that has the Sonography program
Definitely	The OT program was all planned out for me in a stress free environment. At UWM, we are able to become friends with our classmates and teachers because we are not in a class of 100 or more. We become family.
Definitely	UWM had the program I wanted and it's great that the program is an MS/BS program
Definitely	UWM was a big enough school to offer me exactly what I was looking for in my education, but still was able to maintain a personable learning environment with excellent professors.
Definitely	When choosing the correct program that suits my future career goals, UWM has what I needed.
Probably	Because I am happy with how things currently are.
Probably	Convenience and other factors such as living situation and finances

Probably	Definitely had a great time and learned quite a bit, but not sure yet as to how well the program really prepared me for graduate school
Probably	I enjoyed the campus and the city, but have had a few problems with the Occupational Sciences program.
Probably	I enjoyed the classes I took and the teachers were mostly pleasureable
Probably	I enjoyed the fact that it's a research based university. UWM, especially our program, puts emphasis on real world application of your studies which helps the learning experience.
Probably	I had great experiences and great opportunities granted to me at UW-Milwaukee. The program was overall very good and my early experiences here were great, particularly in the Honor's College.
Probably	I have enjoyed the time I have spent at UWM.
Probably	I like the city and it was close to home, since I was undecided when I started it was a good fit for me.
Probably	I like the program I am in
Probably	I like the program I am in and the professors are very knowledgeable.
Probably	I really enjoyed my classes and my professors when I was in the program but I felt that throughout the years, I had some poor advising where even my file was lost and even with the financial aid office I had been given the run around.
Probably	I started at UW-Madison but UW-Milwaukee was a better fit for me. My class sizes have been significantly smaller and the professors more accessible. Overall, a good experience and has prepared me for a career.
Probably	I would choose to attend here because UWM has an excellent occupational therapy program.
Probably	I would have liked to go to UW-Madison, but it is very difficult to get into there.
Probably	It has a well known college of health sciences
Probably	It was a diverse campus with a lot of activities and classes to offer students
Probably	It was a great experience
Probably	It was close to home so I saved money not having to live at school.
Probably	It's affordable
Probably	Many colleges have the major I switched to, only UW-M had my first major.
Probably	My program is too research focused. I might have chosen a different school less focused on this.
Probably	Not sure, depends on if I could do it all over again and still be going into the program of my initial intent or not... If I could be then yes.
Probably	Once I completed high school, I knew that I wanted to attend a university with a physical therapy degree program. However, I didn't know that other private universities offer accelerated programs that can be completed in 6 years. The program is 3 years of undergrad and 3 years of graduate school work. I really like how those universities have the accelerated program. I also feel as if the 6 years would place more emphasis on physical therapy material from the first day that you start. Although I have been enrolled in many classes that emphasize physical therapy material, I also have had to take classes that didn't. I did really enjoy my time at UW-Milwaukee and would highly recommend the program to anyone considering the Kinesiology/Pre-PT program!
Probably	The Athletic Training Program was awesome. The Certified AT's that we were able to work with on a daily basis were great.
Probably	The atmosphere is great!
Probably	The urban setting is a great environment for receiving a culturally competent education, which I feel is essential for my future line of work.
Probably	This is a good program for my career field.

Probably	This is my second degree in the sciences; my first was obtained from a private university. The main difference in my class experience was simply class size. However, I don't feel that the slightly larger class size impeded my ability to learn or experience all that I wanted too. A large class size does allow you to "hide" from interaction and professors were not equally skilled at ensuring all members of the class contributed to the discussion. Finally the big plus was tuition costs. Many would say that costs are rising too quickly; I would disagree. This could simply be a basis due to the high cost I paid at a private institution. I would like to see less emphasis and money spent on sports and recreational structures. Although fun, the business of college sports has become an issue that should not be taken lightly.
Probably	UWM allowed me the opportunity to finish my degree in 4 years as well as the freedom and opportunity for many new experiences.
Probably	UWM is close to home and made commuting easy. The campus was beautiful and not too big.
Probably	While at UWM I have received a lot of one on one attention from faculty and staff, which has really enhanced my learning abilities.
Probably	Yes, because I like the atmosphere of UWM, as well as being able to have T.A's be apart of helping my learning experience at UWM.
Probably No	I really wish I would have explored a new state and attempted to see what else was out there because I love to travel.
Probably No	Marquette has a stronger physical therapy program.
Probably No	The university has a lot of potential to become a great school. Administrators show no commitment of making this school a top school at the national level.
Probably No	There is not much school pride
Definitely No	I chose UWM out of convenience. I also already have a degree...this one was a bit unintentional.
