

2015 College of Health Sciences Graduates

"If you had it to do all over again, would you choose UWM? Why or why not?"

Definitely

At first I chose UW Rock County which has a few undergraduate programs, but is mostly a transfer school. I was pre-med at first, but transferred to UWM and switched majors to Health Care Administration and it was the best decision of my life.

Good college and good instructors.

Great Professors, Great Area

I felt UWM met all my needs both academically, socially and professionally. I have become immersed in the east side community.

I find the Kinesiology Program best suited my interests and has prepared me for the next step on my career path.

I had wonderful professors in my department that really invested in my education over the past four years.

I have had a very good experience at UWM. I like the big class sizes that force me to compete, yet the availability of personal attention/help if I need it.

I have my family here, so no other location was really an option.

I highly enjoyed the professors in my department and found them crucially helpful in the pursuit of my degree.

I love the atmosphere at UWM

I love to be involved in a campus with all different people with various backgrounds. It is a unique learning experience and UWM doesn't pressure anyone to be involved but gives choices to be involved in many areas of student life

I loved my professors and the atmosphere of the college.

I loved the atmosphere of UWM from the first moment that I stepped onto campus during my initial tour. Regardless of my career path, I would have chosen UWM for both the academics and the culture that they bring to the college experience.

I really enjoyed the variety of different courses available.

It is close to my home and is a good size school for classes as well as for buildings.

It was a great experience and I learned a lot.

I've had a wonderfully profound and transformative experience during my four years as an undergraduate at UWM. I am forever indebted for my experiences and look forward to beginning my master's degree at UWM in the ensuing summer.

Limited options for degree

Love living in a city, I feel there is much more opportunities here.

Met awesome people

Over the past 5 years, I have had a wonderful experience here at UWM. The campus is beautiful and the professors are great. Thank you for the experience!

Overall, it was a great learning experience. I loved everything about it.

The connections that I have made have been educational, relational, and spiritual. They are life long relationships and if I had the opportunity I would do it all over again.

The OT program provided me with the skills I need to continue my education.

UWM had an exceptional Occupational Therapy program that allowed me to expand my knowledge and gain clinical knowledge in occupational therapy.

UWM is a great affordable school.

UWM is a large university with a small town feel. The professors can have an interpersonal relationship with you, especially when you get immersed into your major.

UW-Milwaukee offers opportunities to not only be involved on campus but in the community as well. These experiences enriched my overall education and I would choose the university again if I had the chance.
While UWM is a big school it is very easy to get to know your professors. There are also so many opportunities that aren't available at other colleges like helping with research. The professors are also very well known, working with people and other universities around the world.
yes, I enjoyed the experience here at UWM and loved the campus
Yes, it is close to home and the education is the best in the area
Definitely No
Had poor advising and bad course experiences.
Probably
Academically, I loved UWM. Socially, I would have done things differently.
Although it was not my first choice, I did love the campus and the school itself.
Close to home and affordable
I am a single parent and did not want to relocate for college so UWM was a great local choice. If I wasn't a mom, I most likely would have still chosen UWM for location and price(but who knows).
I did not like the large class sizes, the struggle to get into needed classes, and difficulty trying to meet with advisers in my first 2 years at UWM. Once I was accepted into my major. Now that I am in the OT program I am enjoying my experience here much more. Also I am forever grateful for the life impact program which is unique to UWM.
I enjoy that UWM is a research based university in such a urban area and I think that offers a lot for people who are interested in science careers as well as others.
I enjoyed my program, but strongly disliked a lot of the professors in the physics, chemistry, and biology department.
I enjoyed the campus and the city life in Milwaukee
I have had many apathetic teachers who shouldn't be getting paid to teach, who don't know the material any better than the students.
I like it here
I love the school and area, but I also would like to see what else is out there.
I want to chose the university based on the major that I want
I wasn't fully satisfied with my choice of program.
I wish I would have gone to a bigger Division 1 school to experience more things, but UWM is definitely somewhere I truly love.
I would have chosen a different major that may not have been a best fit for me and UWM
It is cheep, but compared to Carroll University the culture, drive, and the teachers are all much weaker.
It is close enough to my family, but far enough away so that I can still have my independence.
It is the only university in the area that is close to where I moved in Wisconsin
It was a exactly what i was looking for
It was close to home, the Communication Sciences and Disorders professors were great.
Not as costly as other universities.
The Com Dis program is very heavily weighted towards Speech Language Pathology, as I wish to continue for Audiology, I may have looked for a school that focused more on Audiology during undergrad.
The cost is high for the level of education and the quality of academic instructors, but it's conveniently located
The degree was fairly new at my time and had many changes as I was attending the University.
The program was exactly what I wanted, but I don't know if I'd want to live in Milwaukee again.
UWM is a great school.

<p>UWM was not my first choice however, I feel my experiences at UWM are one of a kind and I am happy with my choice.</p>
<p>Yes, I enjoyed the entry level Master's program in Occupational Therapy. It was wonderful to get my degree finished quickly.</p>
<p>yes, it got me into a good clinical internship for my major and it is close to home</p>
<p>Probably No</p>
<p>Because I dislike the cold weather</p>
<p>I did not feel that I received good advising</p>
<p>I feel like I would be more motivated if they had a Graduate Program in Sports Management.</p>
<p>I loved my time at UWM and have fallen in love with Milwaukee. However, I think I would have preferred a bigger city.</p>
<p>I was accepted to Marquette, which is where I wanted to go, but I didn't think I could finance it. Looking back, I wish I had just taken out the bigger loan to go to MU.</p>
<p>I would have liked to get out of Wisconsin</p>
<p>I would like to go somewhere further from home.</p>
<p>The kinesiology program was not streamlined, and they did not prepare undergraduates to enter the workforce with proper credentialing</p>
<p>The other students here do not have their heads on straight. It wasn't the most positive experience I could have had in college; in my opinion.</p>
<p>UWM Job placement is not necessarily likely after graduation. I have not learned needed skills in my undergrad for a job in my major.</p>
