

## UWM Senior Survey 2016

A total of 1,974 students who applied for graduation for the Spring 2016 term responded to a survey that asked about issues ranging from overall satisfaction to instruction, advising, career preparation, food service and facilities among others. The majority, 76.6%, of respondents identified themselves as White, 19.7% identified themselves as a student of color, and 3.6% were either unknown or international.

In general, the graduating class of 2016 was satisfied with their experiences at UWM. When asked if they would choose UWM if they had to do it all over again, 89% responded that they definitely or probably would. This rate is similar to the responses found over the past five years.

**Table 1 - If you had it to do all over again, would you choose to attend UWM?**

Year	N	Definitely / Probably	Probably No / Definitely No
2016	1,974	89%	11%

2007	1,659	87%	13%
2006	1,636	86%	14%
2005	1,637	84%	16%
2004	1,125	86%	14%
2003	525	76%	24%

Two-thirds of all respondents (67%) indicated that UWM was their first choice. Given this response together with the overwhelming majority that would definitely or probably choose UWM again suggests high levels of satisfaction in the 2016 graduating class. Of those for whom UWM was their first choice, 92% would choose UWM again, while of those for whom UWM was not their first choice, 79% would choose UWM again.

In addition to the encouraging findings regarding overall satisfaction, many graduating seniors have a sense of commitment to and involvement with UWM at the end of their collegiate experience.

An overwhelming proportion of students report excellent or good quality in instruction, courses accessibility, library services, transportation, and facilities. These findings are consistent with recent exiting cohorts. Further, the majority of all seniors found their experiences with people of different backgrounds excellent or good. Specific results are shown in Tables 5 through 12 on the following pages.

Findings regarding academic advising are more mixed. (See Tables 13 and 14.) Graduating Asian Americans, Southeast Asian American, and American Indian students report slightly higher satisfaction with advising as compared to African American, White, Multi-Ethnic, and Latino/a students.

There are a variety of ways in which the results can be examined. Reports which detail response rates to each survey question are developed for each school/college, as well as by race/ethnicity, gender, UWM as first choice of school, and whether the student lived on or off campus. These are available at <http://www4.uwm.edu/oair/Surveys/gss.cfm>.
