

**DEVELOPMENT OF A COMPREHENSIVE DATABASE FOR RECYCLING
AND REUTILIZATION OF BY-PRODUCTS**

By Tarun Naik and Viral Patel

Reference: CBU-1992-01

ABSTRACT

This database development project is the result of funding made available by Wisconsin Industries Saving our Environment (WISE) and, the College of Engineering and Applied Science of the University of Wisconsin - Milwaukee. This report contains a detailed description on the different databases for recycling and reutilization of by-products which were developed and combined into one comprehensive database.

This report also includes details and sample printouts of each database information, procedure to be followed to access the database, and procedure to request the required information. A proposed plan for the implementation and upkeep of the database is also included.
