PUBLIC PARTICIPATION AND OUTREACH

We will be engaging participants to gain feedback during a series of public meetings throughout the southeastern Wisconsin Region (see page 1 for schedule and meeting locations). This second major component of the socio-economic impact analysis is meant to address concerns that may not have been expressed during the planning process. We hope to hear from ethnic/minority and low-income populations and persons with disabilities in the Region and those who advocate on their behalf.

ENVIRONMENTAL JUSTICE

Environmental Justice seeks to rectify any past or present harm or injustices related to environmental issues, and attempts to ensure that the environment and human health are fairly protected for all people regardless of race, color, national origin, or income. The concept of Environmental Justice is not new; it has its roots in the laws and regulations developed by agencies including the U.S. Department of Housing and Urban Development (HUD), the U.S. Environmental Protection Agency and other federal, state, and local agencies throughout the 20th Century. These laws and regulations were developed to ensure safe, responsible use of resources and to safeguard the population from the hazards of industry and harmful environmental conditions. Planning as a field, particularly land use planning and zoning, had developed from the need to improve and safeguard the health, welfare, and safety of communities. In 1994, EJ was formalized by requiring most Federal agencies, including HUD, to consider how Federally-assisted projects may have disproportionately high and adverse human health or environmental effects on minority and low-income populations. Since then, Environmental Justice has become integrated into HUD’s mission, which includes working with states, tribes, local communities, other grantees, and staff at other Federal agencies to incorporate EJ awareness and planning considerations into program activities. In 2007, SEWRPC created the Environmental Justice Task Force (EJTF) to oversee issues pertaining to Environmental Justice in the Region.

The primary role of the EJTF is to enhance the consideration and integration of environmental justice throughout the regional planning process. The EJTF was instrumental in advocating and executing the development of a socio-economic impact analysis for the regional housing plan.

MORE INFORMATION ON THE REGIONAL HOUSING PLAN

More information on the Regional Housing Plan can be found on the Southeastern Wisconsin Regional Planning Commission website at: http://www.sewrpc.org/SEWRPC/Housing.htm

SOCIO-ECONOMIC IMPACT ANALYSIS OF SEWRPC’S REGIONAL HOUSING PLAN

The Southeastern Wisconsin Regional Planning Commission is the advisory regional planning agency for SE WI and is charged with “the function and duty of making and adopting a master plan for the physical development of the Region.” For the 2035 regional housing plan, the following housing challenges within the Region were identified:

1. A job/housing imbalance in the Region, particularly the supply of “workforce” housing near employment centers;
2. Challenges faced in sustaining the present supply of subsidized housing stock in the Region;
3. A need for accessible housing stock to accommodate persons with disabilities;
4. Housing discrimination;
5. Concentration of low-income and minority populations in the Region’s central cities;
6. The need to encourage sustainable, or environmentally responsible, residential development practices;
7. The national economic recession and related housing crisis.

The socio-economic impact (SEI) analysis is intended to identify, measure, and analyze the potential impacts (positive or negative) of the preliminary housing plan recommendations on environmental justice communities in the Region. Environmental justice communities include low-income and minority populations and persons with disabilities. Specifically, the following five questions were used to evaluate the preliminary plan recommendations:

An Evaluation of the Regional Plan Recommendations:

- What positive social and economic impacts to environmental justice populations, if any, would be expected from implementation of the plan recommendations?
- If positive social and economic impacts would be expected, would environmental justice populations receive a proportionate share of benefits, compared to the regional population as a whole?
- What adverse social and economic impacts to environmental justice populations, if any, would be expected from implementation of the plan recommendations?
- If adverse social and economic impacts would be expected, would impacts on environmental justice populations be disproportionately high, compared to the regional population as a whole?
- If adverse impacts would be expected, what steps could be taken to mitigate disproportionally high social and economic effects on environmental justice populations?

PUBLIC MEETINGS

The public is invited and encouraged to attend a series of meetings where the preliminary recommendations from the regional housing plan and draft findings of the socio-economic impact analysis will be presented. Summary materials will be provided and all meetings will be held from 4:00pm-6:00pm in an “open house” format. An opportunity to provide comments in a “public hearing” format will also be available at the meeting on December 6th.

November

Tuesday 11/13
Rachel Givens Technical College, Michigan Room
Room #113
1001 S. Main Street, Racine

Wednesday 11/14
Kenosha County Job Center, Commons Area
8600 Sheridan Road, Kenosha

Monday 11/19
Matheson Memorial Library/Community Center, Community Room
101 N. Wisconsin Street, Elkhorn

Tuesday 11/27
Rotary Building, Frame Park
1105 Baxter Street, Waukesha

Wednesday 11/28
Washington County Public Agency Center, Rooms 1113 A-B
333 E. Washington Street, West Bend

Thursday 11/29
Ozaukee County Administrative Center, Auditorium
121 W. Main Street, Port Washington

December

Monday 12/3
Heartplace Place, Bethel Empowerment Room
3229 N. Dr. Martin Luther King Jr. Drive, Milwaukee

Wednesday 12/5
IndependenceFirst
540 S. 1st Street, Milwaukee

Thursday 12/6
Tommy G. Thompson Youth Center, Wisconsin State Fair Park, Banquet Rooms 1 & 2
540 S. 84th Street, Milwaukee
The CED socio-economic impact analysis identified key recommendations that would have the most significantly positive impacts on environmental justice communities. None of the preliminary recommendations identified by SEWRPC were implemented, would have a negative impact on environmental justice populations. The entire draft SEI along with links to the Regional Housing Plan and its preliminary recommendations are available online at www4.uwm.edu/ced.

### Table 1

<table>
<thead>
<tr>
<th>Category</th>
<th>Key Objective</th>
<th>Key Finding</th>
</tr>
</thead>
<tbody>
<tr>
<td>Affordable Housing</td>
<td>increase the distribution of smaller homes and higher-density housing options in sewered areas throughout the Region</td>
<td>Recommendation 1 provides the basis for affordable housing throughout the Region by stating that communities with sewer service throughout the Region should provide areas for modest single-family and multi-family housing. Such areas should be identified in community comprehensive plans and allowed for by community zoning ordnances. This would have a significantly positive impact on environmental justice populations.</td>
</tr>
<tr>
<td>Fair Housing/Opportunity</td>
<td>increase housing options for low-income and minority households throughout the Region</td>
<td>Recommendation 1 recommends that communities with sewer/housing options act to reduce the imbalances. If implemented in a widespread manner throughout the Region, this recommendation would have a significantly positive impact on environmental justice communities.</td>
</tr>
<tr>
<td>Job/Housing Balance</td>
<td>increase affordable housing options in municipalities in proportion to the number of moderate and low-wage jobs in a given municipality and increase job opportunities near concentrations of existing affordable housing</td>
<td>Recommendation 4 calls for amending State law to tie the creation of tax increment financing (TIF) districts to the provision of affordable housing based upon netting jobs/housing imbalances. TIF is possibly the most powerful economic development incentive that municipalities have in their toolkits. Therefore, Recommendation 4 should have a significantly positive impact on environmental justice communities.</td>
</tr>
<tr>
<td>Accessible Housing</td>
<td>increase housing options for all persons with disabilities throughout the Region</td>
<td>Recommendation 5, similar to recommendation 4, would incentivize other economic development programs to promote fair housing and affordable housing development, and would have a significantly positive impact on environmental justice communities.</td>
</tr>
<tr>
<td>Subsidized and Tax Credit Housing</td>
<td>increase distribution of subsidized housing units throughout the Region</td>
<td>Recommendation 4 states that communities in economic need priority sub-areas and subsidized workforce housing need priority sub-areas should work with HUD or their entitlement jurisdiction to secure HUD Housing and Community Development Program and other funds to provide housing in the community that is affordable to extremely low-income households. It also states that local PHAs should encourage mixed-income housing development. Expanding housing choices for extremely and very low-income households, particularly in communities where there is a workforce housing need, would have a significantly positive impact on environmental justice communities.</td>
</tr>

### Action Items

CED identified several recommendations within the preliminary RHP that can be improved upon in order to have a more positive impact on environmental justice populations. These CED suggestions call for some revision of selected RHP recommendations as well as highlighting areas where additional research is underway by CED.

**Affordable Housing**

- Recommendation 1 is parallel to Recommendation 1 under Affordable Housing and provides the basis for affordable housing by stating that communities with sewer service throughout the Region should identify areas for multi-family housing. This would have a significantly positive impact on environmental justice communities.

- **Recommendation 2** is still under consideration by CED.

**Fair Housing/Opportunity**

- Recommendation 3 recommends that subgrantees of Community Planning Grants (Including Community Development Block Grants and HOME) should target areas where they will further fair housing as a condition of receiving funding or grants. Such grants and funds are important economic development tools for communities, therefore incentivizing such tools would likely have a significantly positive impact on environmental justice communities.

**Job/Housing Balance**

- Recommendation 7 calls for the modification of government programs to fund accessibility modifications for renters. CED recommends that this also be extended to allow for landlord eligibility.

**Accessible Housing**

- Recommendation 8 is stated that administrators should work together to develop a regional Section 8 Housing Choice Voucher program. Removing the financial disincentives for administering vouchers on a regional basis through cooperation between the local PHAs would likely streamline the voucher process and cut down considerably on administrative costs, which would have a significantly positive impact on environmental justice populations.

**Subsidized and Tax Credit Housing**

- Recommendation 10 calls for the establishment of a Regional Housing Trust Fund for Southeastern Wisconsin that can streamline the process for development of multi-family housing, remove the administrative burdens for funding applicants, spread the funding burden across multiple jurisdictions, and raise the profile of potential affordable housing projects in order to attract more private investment. This would have a significant positive impact on the Region’s environmental justice communities.
