# **GIS Day 2009!**

WEDNESDAY, NOVEMBER 18, 2009

Learn more and help make people aware of the substantial contributions that GIS technology is making in their community everyday, during the tenth annual worldwide GIS Day™. GIS Day is a global event where thousands of users of geographic information system (GIS) technology open their doors to schools, businesses, and the general public to showcase real-world applications of this exciting technology.

GIS Day 2009 will take place on Wednesday, November 18, 2009, during National Geographic Society's Geography Awareness Week, November 15–21, 2009.

Last year's GIS Day celebrations marked the tenth annual global event, educating millions of children and adults in more than 90 countries on the benefits of geography and the role GIS plays in its support of geography.

The University of Wisconsin-Milwaukee is joining the National Geographic Society, the Association of American Geographers (AAG), University Consortium for Geographic Information Science (UCGIS), The Library of Congress, US Geological Survey, (USGS), Sun Microsystems, Hewlett-Packard and ESRI in presenting this GIS technology to you. Your attendance would be appreciated as we join in this global event and attempt to educate millions of people. Your participation could make a difference!
