The policies and regulations contained in this syllabus are subject to change at any point. Such changes will be announced in class and/or posted on the course website. The syllabus has been compiled to be as complete as possible but is by no means a binding document.

**General Info**

Instructor: Prof. Jörg C. Woehl  
Office: Chemistry Building, Room 343  
Office hours: Open door and by appointment  
Email: woehl@uwm.edu  
Phone: 414-229-5223

Class Meeting Times: Tuesday and Thursday, 9:30-10:45 am  
Class Location: Chemistry Building, Room 193  
First Day of Class: Tuesday, September 5  
Last Day of Class: Thursday, December 14  
Midterm (take-home): Tuesday, November 7; due Tuesday, November 14  
Final Exam: Tuesday, December 19, 10:00-12:00 noon

**Course Objectives**

This course is both an introduction to and advanced treatment of Chemical Kinetics. In contrast to a traditional lecture course, we will make use of a computational programming environment (Matlab) in order to explore the theoretical foundations of chemical kinetics and use it as a tool for advanced simulations and problem solving.

**Required Class Material**

Latest version (R2017a) of either  
- “MATLAB Student” plus “Symbolic Math Toolbox” (cheaper if ordered at same time)  
  or  
- “MATLAB and Simulink Student Suite” (includes Symbolic Math Toolbox and many other add-on products)

**Recommended Textbook**

Supplemental Textbooks

Course Prerequisites
“Chemistry 662: Chemical Kinetics and Dynamics” (Chem-662) requires Senior Status and Grade of C or better in CHM 562 (Physical Chemistry II).

Lectures
Your attendance of all lectures is highly recommended. This is a graduate level class, and I expect you to take the necessary steps to take ownership of the material. You know best whether you have truly understood a particular topic and whether you need to read up on it using textbooks, try to solve more problem sets, or seek the help of your instructor; please use the available options accordingly.

Course Website
Desire2Learn (D2L): D2L.uwm.edu. For information on how to use and access D2L, please consult uwmtc.org/?p=870. Problem sets and solutions as well as other course material will be made available on D2L. Visit the course website regularly as important information and announcements may be posted there as well.

Problem Sets
There will be a few homework assignments at irregular intervals. You are required to turn them in by the due date, but they will not be corrected and no grade will be given. Working on these problem sets will help you in preparing for the midterm and final exam; solutions to the homework assignments will be provided on the course website. In addition, you are strongly encouraged to work on your own through more problems from kinetics textbooks.

Grading
The course will be graded as follows based on examinations and a research project:
Midterm (take-home) 35%
Final Exam (in-class) 45%
Research Project 20%
==================================
Total 100%

The **Midterm** is a take-home exam that will be handed out and posted to D2L after the lecture. The midterm will cover all topics discussed in class and problem sets in a format similar to the problem sets. No class will be held on Thursday during midterm week (Nov 9, 2017).

No time extensions or make-up exam will be given for the take-home midterm. If you are unable to turn it in during class, you may upload it to the D2L dropbox.

The **Final Exam** is comprehensive. Only a calculator (programmable or non-programmable) and a single sheet of paper with handwritten notes (recto-verso) are allowed. No books or other material are admitted.

In addition, you will choose one kinetics-related **Research Project** to work on during the second part of the semester. You will present the results from this project to the other students in a form announced by the instructor (either as an oral presentation or poster) during the last week of class. The quality of this presentation will count 20% towards the final grade.

**Tentative Schedule**

Policies
If you will need accommodations in order to meet any of the requirements of this course, please contact me and the Student Accessibility Center (SAC) as soon as possible. Special accommodations for students with disabilities can be provided, but their timely implementation can only be insured if the SAC is contacted ahead of time. For details see www4.uwm.edu/sac/SACltr.pdf.

Department of Chemistry and Biochemistry policies are posted on bulletin boards in the department.

UWM policies related to students with disabilities, religious observances, students called to active military duty, incompletes, discriminatory conduct, academic misconduct, complaint procedures, grade appeal procedures, and final examination requirements can be consulted at http://www4.uwm.edu/secu/news_events/upload/Syllabus-Links.pdf.

Academic Misconduct
Cheating on an exam or other graded material will automatically result in a grade of zero (as a minimum consequence); failure in the course and referral to the Dean may also occur. Academic dishonesty in any form will not be tolerated.

“Academic misconduct is an act in which a student seeks to claim credit for the work or efforts of another without authorization or citation, uses unauthorized materials or fabricated data in any academic exercise, forges or falsifies academic documents or records, intentionally impedes or damages the academic work of others, engages in conduct aimed at making false representation of a student's academic performance, or assists other students in any of these acts.”
