The UWM Archives Committee held one meeting during the 1981-82 school year. Professor Glen Jeansonne was elected chairperson for the committee.

The Archives Committee reviewed and discussed the activities of the UWM Archives which included the negotiation for and the acquisition of Congressman Henry S. Reuss’ political papers for inclusion in the UWM Area Research Center collections. The archivist also reported on the institution’s participation in several federally and state supported grant projects. Grant projects for the past year included continuation of the Milwaukee Area Polish American Records Collection and Processing Project, beginning a new project for creating a traveling photographic exhibit from the Roman Kwasniewski Photograph Collection, and cooperating with six other campuses in the UW-System on a project to inventory and analyze selected records on selected UW-System campuses.

The archives program continues to operate with one professional and a support staff of two student employees. Increased demands for archival services by university offices are increasing the workload and volume of materials for the staff. Future plans include developing proposals for alleviating some of the processing backlog.

Archives Committee, 1981-82
