RESOLUTION

1. WHEREAS the Chancellor has accurately characterized the motivation of many faculty members in their acquiescence to the minimal salary increases they have received during the recent inflationary period as being willing to "help curb inflation" (UWM Report, July 20, 1983);

2. AND WHEREAS the rewards for this contribution have not been and do not seem to be forthcoming;

3. AND WHEREAS the motivation for continuing such contribution to the general benefit of the State of Wisconsin has been consequently consumed;

4. AND WHEREAS it has been reported in the media and elsewhere that certain sums of money have been authorized for administrator salary increases (such reports suggest sums as high as $10,000 each for the President and the UWM Chancellor);

BE IT HEREBY RESOLVED that the faculty of the University of Wisconsin Milwaukkee will consider it a great personal affront to their dignity, their spirit of collegiality with administrators, and their devotion to duty if any administrator in any unit accepts any increase in salary or benefits that may be offered either by the Regents, the legislature, or any combination thereof.

Professor Delbert Clear
