REPORT OF SUMMER SESSION COMMITTEE

This committee was appointed by the Provost for the purpose of making recommendations to the administration in regard to summer session procedures.

Meetings were held on November 28, 1956 and on December 11, 1956 and the following recommendations were formulated:

1) Registration should be held on the first day of the 1957 six week summer session.

2) The regular teaching load for each staff member should be essentially comparable to the teaching load per week, during the academic year, for that staff member.

3) Certain inequities may exist this summer with respect to faculty load and salary because of budgetary limitations, but the Summer Session Committee should study the matter and make appropriate recommendations to correct such inequities beginning with the Summer Session of 1958.

4) Teaching assignments should be on a rotational basis for those requesting summer teaching duties, within limits of practicability determined by the department concerned.

5) Courses should be selected to offer an enriched and varied program for continuing summer session students.
