MOTION: To change the name of the Bachelors' degrees from Bachelor of Arts/Science in Geological Sciences to Bachelor of Arts/Science in Geosciences.

Recommended by the Academic Program and Curriculum Committee following approval by the Department of Geological and Geophysical Sciences and the College of Letters and Science.

RATIONALE: Undergraduate degrees' name would coincide with the graduate degrees' names granted by the Department of Geological and Geophysical Sciences. By having all Departmental degree titles the same, attention is called to the interdisciplinary nature and similarity among all three of the Department's degree programs. Students are more likely to see the Bachelor's degree as a "feeder" into the MS and Ph.D. programs in the Department as stipulated in the Five Year Review of the Program.
