The Academic Policy Committee recommends that the Faculty Senate adopt the following:

Changes from a letter grade to Credit/No Credit are allowed only through the second week of classes.

Rationale:

At the present time students registered in the School of Education can change their course registrations from letter grade to Credit/No Credit anytime prior to the last two weeks of classes. Students in all other Schools and Colleges can make this change only through the second week of classes. As a result of this, students enrolled in the same course are treated differently depending on the School or College they are registered in.

The Academic Policy Committee recommends that the Credit/No Credit policy be made consistent throughout the university with a two week deadline. The committee felt that the intent of the Credit/No Credit status is to encourage students to attempt courses they might not try on a letter grade basis. Since these decisions are made at the time of registration, the deadline should be consistent with the registration deadline (two weeks).
