MOTION: To change the name of the Bachelor of Science in Allied Health to the Bachelor's of Science in Health Science.

Recommended by the Academic Program and Curriculum Committee following approval by the Department of Health Sciences and the School of Allied Health Professions.

RATIONALE: The change was initiated by program faculty as they felt the current name was misleading. Allied Health Professions actually refers to a group of disciplines, e.g., Medical Technologists. The B.S. in Allied Health program does not provide discipline-specific education, but rather provides students with a general education in health sciences.
