1989-90

Annual Report of the Computer Policy Committee

Because the Computer Policy Committee was re-organized last year, the first meeting was not called until February, 1990.

The committee has had two meetings this year, at which the acquisition of a new computer was discussed. To prepare for the new computer the Computer Policy Committee is going to study computer usage policy. A subcommittee was appointed to make recommendations in this area.

1989-90 Computer Policy Committee Members
