Faculty Document #156 dated 5/11/61 states that the board "shall review the policies governing intercollegiate athletics and shall recommend to the faculty, from time to time, changes that appear to be in keeping with the long-term development of the University." In accordance with this directive, the board, this year, is conducting a review of the following problems:

1. Review the policies of the board concerning the intercollegiate athletic program.
2. Evaluate our present conference affiliation and other affiliations that could be made.
3. Review the grants-in-aid to athletes at UW-M and at other institutions of similar size and location.
4. Study future land, building and personnel requirements of the intercollegiate athletic program.
5. Evaluate the contributions of the intercollegiate athletic program to school spirit, the public image and community attitudes.

The board is presently engaged in this evaluation program and is calling members of the faculty, student leaders and other interested parties to aid in its work. Appropriate recommendations concerning the intercollegiate athletic program will be made to the faculty upon completion of this program.
