MOTION:

By the Senate Rules Committee to request that Information and Media Technologies (I&MT) provide electronic balloting for the elections to faculty standing committees to be held in spring of 2006. This electronic ballot would be created in a manner that would guarantee the voter’s anonymity and prevent an individual from voting more than once.

RATIONALE:

The creation of electronic balloting will greatly improve the efficiency of the balloting, and tallying of votes for faculty standing committees. It will also provide immediate access to election results and provide an archive of the election process that can be easily stored and retrieved. The creation of an electronic ballot has the support of the Nominations Committee.
