Motions to Begin the Senate Process of Reviewing the Master Plan Documents

Motions

The Faculty Senate accepts the Master Plan Guiding Principles for Process and Goals.

The Faculty Senate accepts the Phase A report of the Master Planning team.

Rationale

At the outset of the Master Planning process the University Committee passed a motion (FD 2571) describing the Senate’s interest that the faculty be intimately involved in the Master Planning process including its final approval. It concluded with the statement that the Senate will vote on the plan. The plan contains multiple components that have and will continue to appear over the course of 1-2 years. It makes sense for the Senate to address important documents as they appear; hence, the motion to accept two major documents that have been set forth.
