To: Chairperson of the Faculty Senate

From: Teresa S. Johnson, PhD, RN
Executive Committee Chairperson

It was brought to our attention (Executive Committee at the CON) that we were supposed to have sent all individuals with IAS or PIAS status over for faculty senate approval so that they may have voting rights in the CON. This was our oversight, and for that we apologize, but am attempting to remedy as soon as we found out.

The College of Nursing (CON) requests approval for voting privileges at the college level, i.e. CON Faculty and Staff meetings for the following doctorally prepared academic staff on the attached flow sheet. All of these individuals are doctorally prepared and have all of the same responsibilities of a faculty role including teaching, scholarship, and service. The only difference is that they do not have the same responsibilities for developing and maintaining a research trajectory.

August 2009 to present

**Duties**
Clinical Assistant Professor in an ICU/step down unit overseeing 8-9 senior students for 24 hours per week. Responsible for all written assignments such as care plans, journals and philosophy paper. Mentor and monitor students as they progress from caring from one to three surgical/medical patients. As a classroom seminar instructor I taught the nursing process, care plans and assisted the students with the process of simulation. Also responsible for written assignments such as journals and reflection papers.

Taught seminar/lecture for junior level students which is Foundations for Clinical Practice. This class focused on charting, care plans, the nursing process, and documentation.

Worked with Direct Entry MN students in the clinical setting where the older adult was the focus during the past two summers (2012 and 2013).

Worked on the Flex Option for RN to BSN nursing students. Developed and created a Health Promotion and Assessment Course independently which is scheduled to start 6/14.

Currently for spring of 2014, part of the workload is co-teaching an evidence-based research class on line for Graduates students.

RESEARCH EXPERIENCE
2011-present Co-Primary Investigator. Integration of the Omaha System to the Self Management Science Model. The Harriet H. Werley Faculty and Academic Staff Research Award Fall 2011. UWM College of Nursing. Co-Primary Investigator: Mary Jo Baisch, PhD, RN. $1,493. (with Jeana Holt, UWM DNP graduate student assistant & Megan Gorski, UWM OUR SURF Award Spring 2012)

2009-present Project Coordinator. Milwaukee PHASE (Partners for Healthcare Access and Student Education) II Initiative. Lundeen, S.L., PI HRSA #144-PRJ28DL $1,500,000. Expands nursing practice arrangements to improve access to primary health care and increase health care student education in medically underserved communities. (co-author)

2009-present Project Coordinator. IUHP Evaluation of Health Outcomes for Vulnerable Populations. Lundeen, S., PI. UWM Office for Undergraduate Research (OUR) Stipends for Undergraduate Research Fellows (SURF) Award. $4,400 Trina Nance- Spring 2009; Delitha Bostick- Fall 2010; $2,000 Stipend for Alysia Greer - Spring 2011, Summer 2011 and Fall 2011; Shannon Bjoraker - Spring 2012. This longitudinal team research project is an evaluation of health outcomes for existing UWM College of Nursing Institute of Urban Health Partnerships (IUHP) Community Nursing Center (CNC) programs for vulnerable low-income. Objectives: 1) Organize and analyze existing data from IUHP programs serving vulnerable populations; 2) Report on health outcomes on three existing IUHP programs; and 3) Disseminate research findings.

2009-2010 Co-Investigator. Healthy People 2010: Component C- To Expand Public Health Training Programs. Pearcy, S., PI. CDC #144-PRJ28YA. Expanded and further tested the Milwaukee Healthier Teens Initiative training program for health and social services providers.

Explored violence and abuse against women in 15 existing narratives of African American women living with HIV/AIDS through qualitative secondary analysis. Methodological innovations using standardized nursing informatics language and data display software were introduced.

Developed three capacity-building strategies aimed at decreasing the teen pregnancy rate: a) an evaluation of existing longitudinal data; b) a training program for health and social services providers based on evidence-based programming strategies; and c) a data collection and management strategy that will support the evaluation of comprehensive adolescent pregnancy prevention programs.

Utilized nurse case management to improve patient self-management skills, improve health outcomes, and increase the effective use of health resources for indigent, uninsured persons suffering from chronic disease and established a model for replication throughout the Milwaukee County General Assistance Medical Program system.

Funded by Senator Kohl. $450,000.

An intervention study to test outcomes of immunization rates, attendance and grades when school nurse positions were funded in four public schools.

A longitudinal, qualitative study of the concerns of 50 women living with HIV in a Midwestern state. Responsibilities included: data collection through 10 qualitative interviews with each of 15 Wisconsin women living with HIV/AIDS over a two year period; participation in research team meetings; and contributions to data analysis.

The purpose of this study was to describe Therapeutic Touch Krieger /Kunz method (TT) as an intervention in a Mid-western, urban community nursing center. A five year retrospective data analysis was completed. Results revealed 6% of the clients received TT, often in multiple visits, most often for treatment of pain and emotional stability.

The purpose of this study was to determine if full body massage played a role in managing stress levels in healthy adults. A quasi-experimental pre and posttest design with 15 healthy adults measured selected indicators of the stress response. Findings were mixed with significant positive changes of two indicators; negative changes of one; and no change for two indicators.
