Annual Report and Recommendation of the Safety Committee, 1964-65

The UWM Safety Committee met four times during the course of the year. Further meetings are anticipated. The committee has been concerned with the establishment of standard safety procedures in cooperation with the UWM Safety Administrator, the University Safety Director, the Department of Buildings and Grounds, Plant Protection and the Director of Student Housing.

Reports of hazardous conditions, referred to the committee by faculty or students, were brought to the attention of the appropriate University personnel.

One item of primary interest was the establishment of fire safety and evacuation procedures. Though this program has not been completed, much of it has been planned, information obtained and preliminary steps taken in fire alarm identification, labeling and instruction.

**Recommendation:**
It is recommended by the Safety Committee that the UWM Safety Administrator be made an ex-officio member of this committee.

**UWM Safety Committee**

G. Berry, ex-officio
V. Cutler
W. Dreyer
M. Millington
E. Ratledge, Chairman
