Annual Report of the Admissions Committee, 1964-65

The Admissions Committee met four times this year. The Committee authorized the Director of Admissions to admit until September 1966 students with slight pattern deficiencies caused by the new requirements, if they were in the upper 30% of their class.

The other meetings discussed the question of the 20ACT as a cut-off point for the admission of students in the lower half of their graduating class. The all-University Committee passed a resolution that the 20 ACT score "need not be rigidly adhered to." This has been rather variously interpreted on the different campuses. The majority of the UWM Committee feels that for Milwaukee the 20 ACT score should be kept as a definite cut-off point.
