The UWM Admissions Committee held six meetings during 1965-1966. In addition, various subcommittees held a number of meetings and conferences in study of special problems.

Problems Considered and Action Taken Included:

1. A recommendation for enlargement of the Admissions Committee to include six faculty members. This recommendation, postponed from the meeting of May 13, 1965, was presented to the Faculty on November 11, 1965, and passed.

2. A recommendation for Admission policy on pattern deficiencies arising from differences between the old and new admissions requirements. This recommendation was also passed by the Faculty on November 11, 1965.

3. Formulation of a statement of present admissions policies that incorporated actions on Admissions passed by the All-University Admissions Committee, 1964-66.

4. Study of the advisability and timing of modifications in present all-University Admissions policies. In view of the fact that UWM as an institution is in a state of transition, that its constituent parts are undergoing change and enlargement, and that the University is developing relationships with the urban community, the Committee decided not to make recommendations for changes at this time, but to undertake a series of studies to determine what Admissions policies might best serve in the future. A number of subcommittees where formed to study aspects of relevant problems, and various specialists were invited to discuss aspects of their work having a relationship to Admissions policies. These included representatives of the Colleges, the Admissions Office, Project Destiny, the Committee to Study the Problems Facing Freshman, and others.

5. A study of the correlation between the academic aptitude of students admitted to UWM under present Admissions policies and their achievements in the University. The committee concluded that the attrition rate of UWM students appears to be related, to a considerable extent, the factors other than academic aptitude and that since most of these factors are not related to the Admissions function, they should be investigated by an appropriate committee or office within UWM.

6. Various studies of immediate concern to the Admissions Office, including Admissions tests, significant scores on these tests, and Admissions requirements for students applying under the GI Bill. In this latter matter, it was concluded that regular procedures should be followed and that the exceptions made should be chiefly those of pattern.
