Report of the Committee on Nominations and Elections for Elective Members
to the University Faculty Assembly

SLATE OF NOMINEES

THIS IS NOT A BALLOT

Ten to be elected. The Faculty will be given an opportunity to add nominations from the floor.

Distribution of Representatives - At least one faculty member in the Assembly delegation shall come from each of the following six areas: biological sciences, physical sciences, social studies, humanities, education and fine arts. (For purposes of departmental distribution, the Nominating Committee shall follow the structure described in Milwaukee Faculty Document 381 - Report of the ad hoc Committee on Tenure and Promotion - January 12, 1967.)

Note: Please study appended report for a fuller explanation.

Thomas Walton (Social and Philosophical Foundations of Education)
University Committee-Milwaukee Position on Apportionment of Representatives to the University Faculty Assembly

1. Method of Election - Each of the ten Milwaukee members of the University Faculty Assembly shall be elected by the entire Milwaukee faculty.*

2. Distribution of Representatives - At least one faculty member in the Assembly delegation shall come from each of the following six areas: biological sciences, physical sciences, social studies, humanities, education and fine arts. (For purposes of departmental distribution, the Nominating Committee shall follow the structure described in Milwaukee Faculty Document 381 - Report of the ad hoc Committee on Tenure and Promotion - January 12, 1967. In those few instances in which departments are listed in two tenure groupings (history, mathematics, philosophy, geography and pharmacy) the Secretary of the Faculty shall ask the departments involved to recommend to the University Committee the area in which department members shall be counted for distribution purposes.)

3. Term of Office - Terms of office shall be determined by the number of votes candidates receive. In the first year of the University Faculty Assembly, the four candidates who receive the largest number of votes shall serve for a term of three years. The next three candidates in order of number of votes received shall serve for two years. The next three candidates in order of number of votes received shall serve for one year. This means that the first ten candidates in order of number of votes received would represent the Milwaukee campus in the University Faculty Assembly provided all six areas are represented.

4. Nomination Procedures - The Nominating Committee shall prepare a list of nominees. The faculty will be given an opportunity to add nominations from the floor.

5. Election Procedures - The Secretary of the Faculty will circulate ballots to all eligible faculty members, collect and count ballots, and announce results. Each assemblyman will thus be elected by vote of the entire eligible electorate.

6. Vacancies - University of Wisconsin Faculty Document 1663 stipulates that "a vacancy in an elected Faculty Assembly position is filled by a person selected by the appropriate unit University Committee." The University Committee-Milwaukee recommends that the faculty member who at the annual election of Assembly members received the next highest number of votes, shall be declared elected to fill a vacancy in the Milwaukee delegation.

7. Ex-officio Members - University Faculty Council members are ex-officio members of the University Faculty Assembly.

8. Review Provisions - At least every two years the University Committee-Milwaukee shall review the number and apportionment of elected members, and report to the Milwaukee faculty, recommending for their action, if necessary, such changes as may assure a fair and proportionate representation. According to University of Wisconsin Faculty Document 1663, at

* Note: UWM Faculty here defined as in Chapter 6 (6.01)

UWM Fac. Doc. 426, November 9, 1967
least every three years the University Faculty Council shall review the number and apportionment of elected members, and report to the Faculty Assembly, recommending, if necessary, such changes as may assure a fair and proportionate representation. Changes in the apportionment of elected members are made by vote of the Faculty Assembly, on the basis of recommendations from the University Faculty Council.
