
101 Because of the addition of the UWM Space Office, the Committee submitted a revised statement to the Codification Committee describing the membership, functions and responsibilities of this Committee. Basically the Committee serves as the representative of the faculty in making recommendations for the allocation or assignment of space in existing buildings. The recommendation includes changing the name of the Committee to Space Utility Committee. The Codification Committee will be bringing this revision to the faculty at a later time.

109 Because of the close relationship between the activities of this Committee and the activities of the Campus Planning Committee, the Codification Committee recommended, and the faculty concurred (Faculty Document 420, page 11, October 12, 1967) in recommending that the Chairman (or his representative) of the Buildings and Space Utilization Committee serve on the Campus Planning Committee.

115 During the year the Committee considered the disposition of space in Mitchell Hall vacated by Geology and Geography because of the completion of the remodeling of Sabin Hall, the allocation of the first floor of Greene Memorial Hall as a reserve book room and student study area, and the allocation of the entire basement area of Kenwood Library to faculty office use.

Buildings and Space Utilization Committee

L. Bahe, Chairman
M. Besel
W. Goodwin
S. Greenfield
T. Walton, Secretary
G. Berry, ex-officio
