ANNUAL REPORT OF THE GRADUATE COMMITTEE

The Committee held five meetings during 1957-58, on November 13, 1957, February 19, March 5 and 19, and April 25, 1958. At the first meeting, the present status of the graduate work in Milwaukee was discussed following an oral report by Associate Dean Maxwell M. Freeman of the Graduate School.

During the next two meetings, oral reports were received from the chairman of two UW-M departments concerning proposed new programs. Professor Marden told of two proposed programs, one relating to a Master's degree in combined fields of education and mathematics and the other relating to a Master's degree in mathematics primarily for fully employed persons interested in applied mathematics. Professor Shea told about the proposed program relating to a Master's degree in public administration intended for various levels of governmental employees. It was noted that considerable difference existed in the method of controlling these new programs. The control of the mathematics graduate program both at Milwaukee and Madison was to be vested in a Joint Interdepartmental Committee composed of the associate and full professors of mathematics at Madison and Milwaukee. On the other hand, the program in public administration at Milwaukee was to be controlled by the regular Joint Departmental Conference Committee composed of an equal number of representatives from Madison and Milwaukee.

In subsequent meetings, the Committee studied the adequacy of the UW-M representation on the Administrative and other committees of the Graduate School. The Committee feels that the Milwaukee Associate Dean should be given an ex-officio status on all committees of the Graduate School, a status which the other associate deans now have. A recommendation in this regard is being sent to the Administrative Committee-Milwaukee.

The Committee also has discussed the possible advantages of cataloging the publications of members of the UW-M faculty, but as yet no decision has been reached.
