Annual Report of the Student-Faculty Conference Committee on Educational Affairs

The Student-Faculty Conference Committee on Educational Affairs adopted as its initial frame of reference for discussion purposes the report on "Academic Relevance" submitted to the University Student Legislature by Steve Lindblom, President of University Student Government. The report comprises twelve pages and includes fourteen specific recommendations. These were reviewed by the Committee which determined that there were at least four areas which were relevant to its function and not within the purview of other committees.

The Student-Faculty Conference Committee agreed on the following agenda of priorities for its future attention and possible recommendations:

1. Faculty and Course Evaluation
2. The University Calendar and Alternative Proposals
3. Student Participation in Educational Affairs
4. The "Pass-Fail" System

No specific recommendations have yet been taken.
