Recommendation of the College of Letters and Science
(L & S Faculty Document No. 80, approved January 21, 1971)

Recommendation Concerning University Six-Week Grades

1. The present policy of reporting interim grades is sound but needs modification.

2. Interim grades should be reported for all freshmen.

3. Interim grades should be reported to the registrar by the end of the eighth week of each semester. The student would receive an assessment of his academic progress (by mail) by the end of the ninth week of classes.

4. Deans and departmental chairmen should see that their instructors and course coordinators submit valid grades based on tests, essays, recitation or other concrete evidence of achievement. They should be submitted by the prescribed deadline so that they will be useful in advising students.
