The Academic Program and Curriculum Committee was established by the Faculty Senate in May 1970 and activated in October 1970 when members were appointed by the Divisional Executive Committees. The A. P. C. Committee took over many of the functions of the UWM Course and Curriculum Committee. The legislation changed the primary focus of the committee from course approval to the review of new and modified programs.

During 1970-71, most of the work of the committee involved procedural matters. Under the May 1970 legislation, course approval was put in the hands of course and curriculum committees of the individual schools and colleges. Much of the first semester was spent in working out procedures to coordinate the work of these committees and to develop ways in which the various colleges could be kept informed of course changes. These procedures are now being reviewed by the committee in light of the first year's operations.

During the second semester, the procedures to be used in reviewing program proposals were worked out. A set of guidelines was developed to supplement the C. C. H. E. format for program submission. It was the feeling of the committee that new programs should utilize the capabilities of UWM as much as possible. It is hoped that the new procedures will encourage the involvement of several units in the development of new programs. The committee also began a review of existing programs and courses.
