The reduced purchasing power of the UWM Library, brought on by dramatic inflation, budget constraints, and increased publisher output, is a matter of grave concern to campus administration, library administration and the University Library Committee. The provision of library resources to support instruction and research is vital to our institution's current and future programs. To that end, the University Library Committee submits the following resolution for consideration by the UWM Faculty Senate.

"RESOLVED that the UWM Faculty Senate urge campus administration, Central Administration of the UW System, and the University of Wisconsin System Board of Regents to recognize the critical fiscal needs of the libraries of the UW System and aggressively to seek 1976-77 funding levels that will halt further erosion of quality in library collections and services."
