

A

Zoo Horses

The zoo has 7 cows and some horses in a big pen. There are 15 animals in the big pen. Then 4 more horses ran into the pen. How many horses are there now in the pen?

Answer: 12

Explain your thinking in this box. Use pictures, numbers, or words to answer the question.

B

Zoo Horses

The zoo has 7 cows and some horses in a big pen. There are 15 animals in the big pen. Then 4 more horses ran into the pen. How many horses are there now in the pen?

Answer: 12

Explain your thinking in this box. Use pictures, numbers, or words to answer the question.

$$15 - 7 + 4 = 12$$

C

Name _____

Zoo Horses

The zoo has 7 cows and some horses in a big pen. There are 15 animals in the big pen. Then 4 more horses ran into the pen. How many horses are there now in the pen?

Answer: ~~Zoos and horses~~

Explain your thinking in this box. Use pictures, numbers, or words to answer the question.

$$\begin{array}{r} 7 + 4 + 15 = 26 \\ \text{ooooo} \quad \text{oooo} \end{array}$$

I got 7 plus 4 and I got 15. then I counted up to 26

D

Zoo Horses

The zoo has 7 cows and some horses in a big pen. There are 15 animals in the big pen. Then 4 more horses ran into the pen. How many horses are there now in the pen?

Answer: 15

Explain your thinking in this box. Use pictures, numbers, or words to answer the question.

The student has drawn several diagrams and equations to solve the problem. On the right, there is a rectangular box containing seven small circles, representing horses. Above this box are seven vertical lines, with the first three being taller than the last four, representing cows. In the center, there is a simple addition problem: a plus sign followed by a square containing the number 7, and another plus sign followed by a square containing the number 4. Below this is a horizontal line, and under the line is the number 15.

E

Name _____

Zoo Horses

The zoo has 7 cows and some horses in a big pen. There are 15 animals in the big pen. Then 4 more horses ran into the pen. How many horses are there now in the pen?

Answer: 12

Explain your thinking in this box. Use pictures, numbers, or words to answer the question.

$$\begin{array}{r}
 00000 \\
 00000 \\
 00000 \\
 + 15 \\
 + 4 \\
 \hline
 19 \\
 - 7 \\
 \hline
 12
 \end{array}$$

~~00000~~ + ~~00000~~ = 12 ' 00

First I had 15 animals then 4 horses came so there's 19 animals now. But seven were cows. So I take 19 minus 7 and my answer was 12.

F

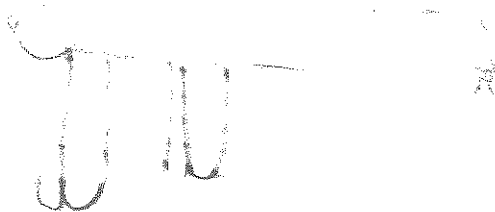

Zoo Horses

The zoo has 7 cows and some horses in a big pen. There are 15 animals in the big pen. Then 4 more horses ran into the pen. How many horses are there now in the pen?

Answer: 11 horses

Explain your thinking in this box. Use pictures, numbers, or words to answer the question.

oooooooooooooooooooo — oooo = 11 horses
