Data on Partnerships at UW-Milwaukee

Institutional Research Directors:

Please complete the form below, and return with attachments to David Blough, UW System Administration, Office of Policy Analysis and Research, 608-265-9796, dblough@uwsa.edu, by Monday December 16, 2013. Electronic versions are preferred.

Questions? Please consult the FAQ beginning on p. 3 or contact David Blough.

1. Number of businesses or organizations hosting co-op or internship students

The number of businesses or other non-UW organizations that hosted UW co-op or internship students (undergrad, grad, or professional) during the 2012-13 academic year. In addition to the total number, please attach a list of the businesses and organizations if it is available.

Number: ___976_____
Name of attached file(s), other notes: ____2013-UWM-Partnerships-for-System.xlsx_____

2. Number of organizations in service-learning, community-based research, or volunteer partnerships

The number of non-UW organizations at which UW students and/or staff volunteered, engaged in service-learning, or engaged in community-based research during the 2012-13 academic year. In addition to the total number, please attach a list of the organizations if it is available.

Number: ___971_____
Name of attached file(s), other notes: ____2013-UWM-Partnerships-for-System.xlsx_____

3. Number of cultural or arts-related partnerships

The number of non-UW organizations that partnered with your institution in support of cultural or arts events during the 2012-13 academic year. In addition to the total number, please attach a list of the organizations if it is available.

Number: ___234_____
Name of attached file(s), other notes: ____2013-UWM-Partnerships-for-System.xlsx_____

Page 1 of 6
4. **Number of businesses or organizations receiving business development assistance**

The number of business or non-UW organizations that received business development assistance during the 2012-13 academic year. Please indicate if the total number includes businesses assisted through UW-Extension (such as the Small Business Development Center or Wisconsin Entrepreneur's Network), and report the number so assisted, if possible. In addition to the numbers, please attach a list of the businesses or organizations if it is available.

Number: ___1,009___

Number assisted through UW-Extension (if included in amount above): _______________

Name of attached file(s), other notes: ____2013-UWM-Partnerships-for-System.xlsx__, The names of 826 partnership organizations are not included in the attached file because they were not disclosed. ____

FYI: In addition to #4 above, UW System Administration is requesting information on licensing and technology transfer partnerships from WARF, WiSys, and the UW-Milwaukee Research Foundation.

5. **Number of businesses or organizations hosting clinical, legal, or social work placements**

The number of businesses or other non-UW organizations that hosted UW students (undergrad, grad, or professional) in clinical, legal, or social work placements during the 2012-13 academic year. In addition to the total number, please attach a list of the businesses and organizations if it is available.

Number: ___626___

Name of attached file(s), other notes: ____2013-UWM-Partnerships-for-System.xlsx____

6. **Number of schools hosting student teachers**

The number of PK-12 schools that hosted UW student teachers or practicum participants during the 2012-13 academic year. In addition to the total number, please attach a list of the schools if it is available.

Number: ___230___

Name of attached file(s), other notes: ____2013-UWM-Partnerships-for-System.xlsx____
Frequently Asked Questions about the Partnership Data Collection

General

1. Why are we being asked for data on partnerships?

The UW System does not operate in a vacuum; many of our contributions are amplified through collaboration with others. The UW System attempts to consciously recognize and communicate the breadth and impact of its partnerships. This effort is reflected in the UW System’s Strategic Framework, presented to the UW Board of Regents in 2007, and the Growth Agenda for Wisconsin, which together convey the importance of partnerships in extending the UW System’s impact on communities and society at large. These goals are reflected in the UW System’s annual accountability report, *Knowledge Powers Wisconsin’s Future*. In addition, the UW System is required by the Wisconsin 2011-13 biennial budget (Act 32) to report on a variety of accountability measures, including partnerships. (See [http://www.uwsa.edu/opar/accountability/](http://www.uwsa.edu/opar/accountability/) for both reports.)

UW institutions are being asked to provide partnership data for use in these reports. In addition, we hope institutions will find these data useful for understanding and increasing their community engagement.

2. What is meant by “partnership”?

Partnership in higher education occurs within the larger framework of community engagement. As defined by the Carnegie Foundation, partnership “…focuses on collaborative interactions with community and related scholarship for the mutually beneficial exchange, exploration, and application of knowledge, information, and resources (research, capacity building, economic development, etc.).”

Within the context of the Collaborations strategy of UW System’s Strategic Framework, a partnership is a relationship between a UW institution and one or more external entities, in which each partner contributes resources that are not supplied by the other partner(s) and are necessary to achieve a common goal or goals. Resources include but are not limited to staff, facilities, money, and information. Partnerships can be either time-limited or ongoing.

Some elements of partnerships include:

- Reciprocity and/or exchange
- Mutual benefit
- Mutual planning, implementation, and assessment
- Increased capacity of both partners

3. Why are these particular items being requested? Why doesn’t this list include __________ as a type of partnership? (Examples: Dual degrees, collaborative degree programs, transfer articulation agreements, study abroad programs, educational/academic partnerships, interns from external organizations hosted by a UW institution, community outreach activities, etc.)

The requested items are at best a partial reflection of the range of partnerships at UW institutions. The items were identified based on (1) representation of a variety of different partnership activities, and (2) relative availability of information at a majority of UW institutions. Many other types of partnerships are addressed in...
a different way in the systemwide edition of *Knowledge Powers Wisconsin's Future*. (For example: Collaborative degree programs, transfer articulation agreements, study abroad, and community outreach and engagement.) Institutions are welcome to report on additional types of partnerships in their institutional editions of *Knowledge Powers Wisconsin’s Future*.

4. **Why are we asked to provide the number of partners rather than the number of students/interns/placements, the duration of the partnership, or the impact of the partnership?**

   Within the UW System’s Strategic Framework, the impact of partnerships is emphasized in the Stronger Communities strategy, and is currently being measured through civic participation and community outreach and engagement. The Collaborations strategy emphasizes the extent or range of partnerships, and is being measured with the data requested here along with collaborative degree program data. In addition, examples throughout the systemwide edition of *Knowledge Powers Wisconsin’s Future* illustrate the depth, duration, and impact of partnerships. Institutions also can provide additional information in their institutional editions of *Knowledge Powers Wisconsin’s Future*.

5. **Why are we asked to provide lists of partners in addition to an overall count of each type?**

   The lists of partners help us better understand the data UW institutions are currently able to provide. They also may be used to get a sense of the overlap in partners across institutions (for example, a business hosting interns from more than one UW). We have no plans to publish the lists. If some partnerships are subject to confidentiality agreements and you are not able to provide names of partners, please make a note on the form.

6. **Should we include the partnership data in our institutional accountability report / institutional *Knowledge Powers Wisconsin’s Future* report?**

   We are requesting the partnership data for use in the systemwide edition of *Knowledge Powers Wisconsin’s Future* and in the *UW System Legislated Accountability Report*. You are also welcome to use part or all of it in your institution’s edition of *Knowledge Powers Wisconsin’s Future*. Institutions can fill in the Partnerships indicator under Core Strategy 7: Collaborations with information they feel best reflects partnership activity at the institution. Partnership activity may be relevant in other sections of the report as well.

7. **Is an entity a partner if it solely provides money?**

   Our intent is to capture partnerships that reflect mutual involvement to achieve a shared goal, rather than simple fee-for-service arrangements. In that sense, an organization that sponsors or funds a program, project, or event would be considered a partner. An organization renting a facility or paying for a standard training class would not be considered a partner.

8. **What is meant by "academic year"?**

   UW System Administration typically defines the academic year as summer, fall, winter, spring. If your data is for some other time period (fiscal year, calendar year, fall-spring-summer academic year), please make a note on the form.

9. **What is meant by “non-UW organizations”?**

   The intent is to capture partnerships that are external to UW institutions, rather than partnerships that are exclusively among UW institutions, their divisions, or their departments. As a rule of thumb, if an organization
does not fall under the authority of the UW System Board of Regents, it can be considered a non-UW organization.

**Co-ops or internships**

10. **How do we count internships or other placements at multiple sites of the same business or organization?**
   (Examples: Students interning at different Walgreens, students placed at several clinics of the same HMO.)

   We recommend counting each site as a partnership, based on the assumption that the mutual benefit or exchange is likely to have the greatest impact at the specific site.

11. **If 25 different academic departments submit lists of organizations at which they placed interns, should duplicate organizations be removed?**

   Ideally, we would like the data to reflect the number of organizations (or sites) that benefit from each type of UW partnership, rather than the number of UW divisions or departments that are involved. (However, the duplicated information may be useful for UW institutions to understand levels of community engagement within different divisions or departments.)

12. **Should internships include only credit-bearing internships?**

   Internships can be credit-bearing or non-credit bearing.

13. **Should work study placements with an external organization be included with co-ops and internships?**

   No, but UW institutions may report that information in their institutional edition of *Knowledge Powers Wisconsin’s Future*.

**Service-learning, community-based research, or volunteering**

14. **What is meant by “community-based research”? Since it seems like a faculty activity, why isn’t it reported separately from service-learning and volunteering?**

   Community-based research occurs in a community setting and involves community members and/or organizations in the design and implementation of the project. It is similar to service-learning and volunteering in that it engages the university with the community and can involve students and/or faculty.

15. **Is volunteering restricted to activity that is done as part of being a student or a staff member, or does it include personal volunteering?**

   Since the intent is to collect partnerships between UW institutions and external organizations, volunteering should reflect activity that a UW institution has some role in. For example, if a UW institution helps match volunteers with an organization, then it can be considered a partnership between the UW and the organization.
Business development assistance

16. For business development assistance, if a professor provides consulting to an organization, could this be counted? Does it matter if the consulting is paid or unpaid?

Yes. No.

Clinical, legal, or social work placements

17. Should a clinical placement in a school setting be counted as a clinical placement?

Yes.

Student teachers

18. For the number of schools hosting student teachers, should we count schools or school districts?

We recommend counting at the school level, based on the assumption that the primary benefits of the partnership accrue at the school level and based on the understanding that student teacher placements are typically approved by school principals.

Student organizations

19. The 2008-09 collection asked for the number of student chapters of national professional organizations. Is this information required for this year’s collection?

No, we are not requesting this information. However, campuses are welcome to collect and report it in their individual institution’s accountability report and make use of it for other purposes.
